- High Performance Fabric: ECO Recycled Polyester, Bamboo Charcoal, Anti-bacterial, Warm & Light, UV Protection, Fast Absorption & Quick Dry etc
- All Kinds of Knit Fabrics such as fleece, jacquard, pique etc
- Soft-shell lamination Fabrics

Company Profile

The combination of fabric technology and healthy living has always been the principle goal of the AGT in our R&D department.

AGT was therefore born to bring a revolution in the textile industry.

AGT stands for "Technical" and "Care" with the aim of "utilizing innovative technologies in order to offer to the new-era textile a greater number of diversified functions".

This spirit of continuity and consistency can be found in all products of the AGT family. This is a technology feast of healthy living.

Let's experience the utmost comfort and pleasure.

- Taiwan functional Textiles Certification System—A bridge for global functional textile world

Company Profile

Taiwan Textile Federation (TTF) is committed to planning and promoting the "Taiwan Functional textiles" (TFT) certification system. At present, TTF has established several certification standards, including the standard for 20 products, based on the criteria set up by "Committee for Conformity Assessment on Accreditation and Certification of Functional and Technical Textiles" and offered product certification service to functional textile manufacturers and merchandisers. The TFT certificate label is now duly registered in Taiwan, the US, the Europe Union, the Korea and Japan.

- Moisture transferring and quick drying textiles
- Water repellent textiles
- Deodorized textiles
- Waterproof and breathable textiles

Major Products

- TPU Laminated Fabrics, Weldable Fabrics
- Waterproof Fabrics, Airtight Fabrics

Company Profile

Thermoplastic Polyurethane industry has been developed in Taiwan for several decades, however due to lack of qualified high bonding laminators, there was a big gap between the film makers and downstream manufacturers. Thus, a group of experienced people that came from textile, chemical and electronic industries gathered together to set up Tomlong Techstile Corp. to meet the growing demands from many applications.

Being distinct from other laminators in garment fabrics, Tomlong deeply involve in product design and finished product making. After working as the bridge between two fields for many years, our rich knowledge, quality technique and excellent service help us have earned good reputation among many famous brands in outdoor, sport, marine, automobile, medical, military industries and more. Now Tomlong is not only specialized in high bonding TPU film lamination, but also is a total solution provider in composite material.

We have flexible manufacturing machines and QC inspection equipment to fulfill customers' need. We are able to laminate/coat diversified textiles such like nylon, polyester, N/T, cotton, N/C, recycled yarns; woven, knitted or nonwoven. Most of our laminated/coated fabrics are for waterproof or inflatable devices. About a half of our working partners are graduated from university and are always taking challenge, that make us being recognized as a technical oriented company.
