## Company Profile

MEC ADDHEAT - Leading manufacturer of wearable heating technology  
ADDING HEAT INSIDE WHEN ITS COLD OUTSIDE MEC Addheat's core philosophy is to provide comfort through heat. We have achieved this by developing a heating system that can be used in several different applications. The radiant coils embedded into our patent pending heating modules provide people with not only comfort, but relief. Our heating technology can provide warmth on demand to a motorcyclist touring the country in the cooler months to a patient suffering from the pain of arthritis.

We combine years of experience, extensive research & design and a state of the art manufacturing facility to help your dreams become a reality. This comprehensive approach is apparent from conception to mass production. The components of our technology include: heated panels, digital temperature controllers and other components. These systems are uniquely tailored for integration into various textiles such as gloves, garments, lumbar supports, and infrared medical devices... to name a few. We have succeeded by meeting the needs of our customers.

This means we never stop innovating and more importantly, we never stop evolving.

Trusted by some of the world's best known apparel brands, MEC ADDHEAT is recognized globally as the proven innovator of wearable heating technology.

## Company Profile

RIH JAN company source 90 percent of the yarn and other materials we use here in Taiwan – for superior quality. Since our establishment in 1985, we've worked hard not only to set ourselves apart as an industry leader, but also to develop partnerships with other producers. Presently, we have over 30 local knitting, dyeing and printing facilities as partners. Our Taiwan factory boasts nearly 100 pieces of the best in knitting and finishing machines. This allows us to produce 500,000 yards of fabric every month. It also affords us a production capacity of more than 1 million yards. And our in-house QC team checks every order for colorfastness, stains, holes and other consistencies throughout production. An independent QC team further ensures every order meets your standards.

## Company Profile

When it was founded in 1955, Shinkong Textile Co., Ltd. was one of the first textile mills in Taiwan. From the beginning, we have strived to exceed customer expectations with the most innovative products. This drive for trendsetting innovation has helped elevate our brand to international recognition in synthetic fabric design and manufacturing. We were the first company to specialize in woven yarn dye synthetic fabrics and have since expanded into both woven and knits, covering yarn dye, piece dye, and printing fabrics.

Today, Shinkong Textile's continued commitment for quality and innovation have led us to become a leader in the fashion, outdoor, sportswear, and casual wear markets. Our products combine both functionality and style for customers around the world.

Further, we enjoy great flexibility in cooperation with our affiliate Shinkong Synthetic Fibers Corporation and strong market capitalization under the wide umbrella of the Shinkong Group, which offers banking, insurance, securities, manufacturing, shopping, security, hospital, and philanthropic services.

- TPU Laminated Fabrics
- Weldable/Sealable Fabrics
- Waterproof Fabrics
- Airtight Fabrics

## Company Profile

Thermoplastic Polyurethane Industry has been developed in Taiwan for several decades, however due to lack of qualified high bonding laminators, there was a big gap between the film makers and downstream manufacturers. Thus, a group of experienced people that came from textile, chemical and electronic industries gathered together to set up TOMLONG TECHSTILE CORP. to meet the growing demands from many applications.

Being distinct from other laminators in garments fabrics, TOMLONG deeply involve in product design and finished product making. After working as the bridge between two fields for many years, our rich knowledge, quality technique and excellent service help us have earned good reputation among many famous brands in outdoor, sport, marine, automobile, medical, military industries and more. Now TOMLONG is not only specialized in high bonding TPU film lamination, but also is a total solution provider in composite material.

We have flexible manufacturing machines and QC inspection equipment to fulfill customers' need. We are able to laminate/coat diversified textiles such like nylon, polyester, N/T, cotton, N/C, recycled yarns; woven, knitted or nonwoven. Most of our laminated/coated fabrics are for waterproof or inflatable devices. About a half of our working partners are graduated from University and are always taking challenge, that make us being recognized as a technical oriented company.

 [filaweaving.org.tw](http://filaweaving.org.tw)

 [tsfa2@textiles.org.tw](mailto:tsfa2@textiles.org.tw)

## Major Products

TSFA members supply the following products:

Nylon fabrics, 100% polyester suiting, 100% polyester fabrics for lady dresses, acetate fabrics, rayon fabrics, Modal<sup>®</sup> fabrics, Tencel<sup>®</sup> fabrics, filament-spun interweave, spandex (elastane) fabrics, high-twist fabrics, jacquard fabrics, metallic fabrics, lining fabrics, flocking fabrics, industrial fabrics, interior fabrics, yarn-dyed fabrics, functional fabrics, coated & laminated fabrics, tire cords, screen mesh fabrics, bridal dresses, embroideries, laces, braids, ribbons, labels, fastener tapes, neckties, twisted yarn, textured yarn, shoelaces

Note: Modal<sup>®</sup> and Tencel<sup>®</sup> are the trademarks of Lenzing AG.

## Company Profile

Founded in 1953, TSFA currently has close to 140 members the majority of whom are specialized in manufacturing woven cloth of man-made filament. Over 90% of the manufacture (including Nylon cloth, Polyester cloth, special cloth, and new-synthetic fiber woven cloth) is for export and mostly goes to the production of items like functional wear, snow coats, apparel linings, suits or shirts, cover sheets, handbags and luggage, fire-retardant and bullet-proof clothing, anti-UV industrial items, and so many others.

With incessant development for new synthetic fibers and technological improvement in dyeing and finishing being high on TSFA members' business strategy that is centered around greening in every phase of manufacturing, Taiwan's man-made filament weaving industry is proud to supply functional cloth of very high quality at very competitive prices. Statistics-wise, Taiwan's exports of filament weaving industry for 2014 is recorded at US\$2.95 billions. As Taiwan's filament-weaving industry is very much intent on technological development and incessant R & D, there will be more and more functional fabrics for apparel and industrial applications getting launched.
