Major Products

Nylon-6 chip, Nylon-6/66 filaments yarn, Nylon air textured yarn, and Nylon engineering plastic chip

Company Profile

From nylon chips to nylon FDY, nylon-66 FDY, special yarns, nylon air textured yarns, Chain Yarn has never ceased to provide the top-quality products and services to customers under its belief – Sincerity, Quality, and Customer First – over the past two decades. As such, Chain Yarn has become a leading nylon manufacturer of the world in recent years. Making use of high-speed spinning machine and its unique design, Chain Yarn has successfully developed nylon-6 materials, including "FINE DENIER YARNS" and "HIGH COUNT YARNS", and has thus produced textiles with denser, lighter, and softer than ever. Chain Yarn is progressively developing new products and technologies at this moment in order to upgrade its competitiveness advantage for the enterprise.

Capacity:

1. Nylon-6 Chips: 95,000 tons/year
2. Nylon-6 FDY: 55,500tons/year
3. Nylon-66 FDY: 14,500 tons/year
4. Nylon-6 & Nylon-66 Air Textured Yarns: 5,000 tons/year

Brands:    

Sup-Lite®: light, windproof, soft and skincare.

Dura-Fila®: high tenacity, durable, dimension and heat stability.

Greenlon®: eco-friendly, CO₂ reduction, energy saving and wastes reduction.

Fun-Max®: luster different, warm-keeping, moisture absorption, wind proof and customized service.

👤 Chao, Joue / The Secretary-General

Company Profile

The development of FRP industry in Taiwan is very similar to that of the industrialized countries. It started from the processing of FRP products in 1966, followed by the manufacturing of raw materials and then entered the advanced composites industry, through the R&D of academic and industrial research institutes.

The total FRP products in Taiwan is 500,000 tons in 2015. The major traditional products are yacht, fishing boat, bath tub, panel, cooling tower, tanks and sporting goods etc. SMC and BMC are developing for our booming automobile and construction industry. High performance engineering plastics and composites have found expanding used in construction, public transportation, watercrafts, aircraft, electronics, appliances, furniture and business machines, etc.

Material Science and Technology are the foundation industry. Composite material is the key composite for the current and future and material industry. Moreover, the applications of composite material are being expanded to almost everywhere of human life. Hence, the development of composite is strongly encouraged by government and industry in Taiwan. Great efforts are contributed from universities, government agencies and industries. Coordination is conducted by the RP/C society has been enjoyed the economic growth in Taiwan for the past year.

TECH HENRY

Company Profile

FOREVER ENERGY TECHNOLOGY CO LTD. (Parent Company)

Our rapid heating and cooling technology make it possible to raise the temperature on mold to 250 degree for PC, or 400 degree for PEEK in about 10~40 seconds, in order to meet the goal of mass production. On the other hand, cooling the temperature to 60 degree for opening mold in less 20 seconds. In this condition, light weight and the production as one piece per minute of auto parts will be inevitable result.

The industries that our technology can be applied, in addition to the lightweight of (high-speed rail, trains, subway (MRT), hull, wind power, Aerospace, 3C, pipeline, metallic hot press/forged are all applicable.

Company Profile

Glotech Industrial Corp. (Parent Company, known as Glotech)

Founded in 1997, is a professional E-glass fiber fabric producer; we strive to develop and achieve the highest level of technology with constant innovation delivering the best quality and services to customers. Adhering to a corporate philosophy of having a foothold on Taiwan and taking a broad view of global, Glotech's production lines have extended from Taiwan to Suzhou of China. The sales scope covers Europe, North American, China, Japan and Korea. Products and services are well received and endorsed by global brand names. Currently, Glotech has 893 fabric looms, which takes Glotech's production capacity high up to 190 million meter yearly.

Main Product & Application:

- Electrical
 - Fiberglass fabric – Copper Clad Laminate (CCL) à Printed Circuit Board (PCB)
- Industrial
 - Fiberglass fabric – Rod Cloth, Constructional Cloth, Filtration Bag, Grinding Wheel, Electrical Insulation Tape

Glotech Technical Materials Corp. (Sub-company, known as GTM)

Acquired by Glotech Industrial Corp in 2007 and aiming at material supply integration to be free from yarn dependence, An experienced fiberglass manufacturer and effectively managing materials' performance and quality.

Main Product & Application:

- Electrical
 - Fiber Glass Single Yarn - Fiberglass fabric
- Industrial
 - Fiberglass Plied Yarn, Roving, Chopped Strand à Fiberglass Needle Mat/ Board/Texturized Yarn → Fire / Heat / Sound Insulation & Resistance on furnace, pipeline, engine, wall, ceiling,... etc
 - Other Textile for Reinforcement / Construction

Company Profile

LIH FENG JIING ENTERPRISE CO., LTD. was founded in Taiwan. Our main products are all kinds of high temperature, fireproof, thermal and acoustic insulation materials, and widely applied to autos and motorcycles industry, building industry, household appliances industry, steelworks, petrochemical industry and glass industry, etc. Especially in autos and motorcycles industry. To serve customers in China, Shanghai Fengya Fireproof and Insulation Materials Co., Ltd. was established in Shanghai Nanhui Industrial Zone.

Main Product

- Needle mat and products
- Insulating sheets for engine hood and heat shield
- Glass (Basalt, Silica) fiber woven fabric
- Stainless steel wire products
- High temperature insulation brick
- Thermal insulation packing kits
- Paper insulation (glass tissue, micron glass fiber paper, ceramic paper, ceramic paper)
- Glass (Silica) fiber needle stitch composite mat
- Stainless steel wool and products
- Ceramic fiber blanket

- Glass roving (continuous)
- Texturized yarn
- High temperature insulation boards
- Metal stampings

PRODUCT APPLICATION

Automotive, Motor, ATV, Racing

- Heat insulation blanket for engine hood and cabin.
- Heat insulation material for Engine room.
- Catalytic converter seals and mesh wraps.
- Space ring exhaust seals and air gap seal.
- Thermal and acoustic insulation for exhaust system and silencer.

- Heat insulation for manifold
- Use E-glass/PP mat as heat protection shield.
- Anti-vibration components.
- Air bag filter.

Industry

- Performance Industrial Pipe and Board Insulation for Power plant, pipelines, turbines and fittings in petrochemical industry.

Fiberglass Products

Company Profile

Fiberglass Yarn

TGI is capable of producing a variety of fiberglass yarn with single filament diameters in G (9 μ m), E (7 μ m), D (5 μ m), BC (4 μ m). TGI fiberglass yarn is not only woven in large volume into E-glass fiberglass fabric for the production of printed circuit boards (PCB), but also in an extensive range of applications requiring strengthening, reinforcement, and related uses.

Fiberglass Fabric

TGI weaves a complete series of E-glass fiberglass fabric such as #7628, #2116, #1080, #106, #1027 and etc., ranking it among the world's top two manufacturers by production scale. TG supplies fiberglass fabric to domestic and overseas Copper Clad Laminate (CCL) manufacturers to be reworked as prepreg and laminate, the preparatory status of PCBs. By adhering to the highest quality standards, TG has become an internationally renowned and trusted manufacturer.

Fiberglass Reinforced for FRP Industry

TGI fiberglass reinforced products are Chopped Strand Mat, Conventional Roving, Direct Roving, Woven Roving and Chopped Strand. With outstanding characteristics of high impact strength and excellent electrical insulation properties, fiberglass reinforced is widely used in FRP industry.

Joshua Ho / Sales Manager

Major Products

TPU Laminated Fabrics; Weldable Fabrics; Waterproof Fabrics; Airtight Fabrics.

Company Profile

TomLong was established in 2004, first as a trading company. The company was primarily involved in the buy-and-sell of TPU resin, film, coated fabrics and TPU-related finished products. With our extensive knowledge in TPU manufacturing and application, we also provided consultation to new TPU users.

Due to the high demand of TPU-coated fabrics and a lack of qualified laminators in Taiwan and the rest of Asia, TomLong put together a group of experienced engineers and constructed the new laminating factory in 2005 in order to concentrate full-time in TPU lamination.

Although the company hasn't long history, the members of the engineering team have been engaged in the TPU/PU coating & laminating production for more than twenty years. Some core members came from Na Ya Plastic, the largest plastic company in Taiwan; others came from Coating Chemical, a well-known TPU resin and PU base-adhesive manufacturer. Due to the rich integration of our previous experience, TomLong is able to specialize in waterproof / breathable coating and TPU film lamination. Thanks to our array of diverse, high-quality products, we have been successful in the outdoors, medical, marine and many other industries.

Eric Sung / Sales Manager

**Major Products**

Epoxy Resin (Impregment; RTM; Hand Layout); Woven Cloth (Carbon/
Glass/Aramid); Bulk Molding Compound (BMC); Dry BMC; Engineering
Plastic Compound

Company Profile

Since its founding in 1973, Wah Hong concentrated in the production and sale of advanced material to integrate with the industry development. We continuously adopt new technology, improve manufacturing processes and reinforce reasonable management to cope with the dynamic and fiercely competitive industry.

Over the past three decades, we have successfully developed composite materials and advanced plastics to support sporting equipment, automobile and electronics industries. Starting from 2000, Wah Hong triggered immediate response to the market trend by developing and manufacturing Diffusion films and Reflection films to meet the booming TFT LCD industry requirement. Furthermore, we continuously adopt complete line of optical films to be a total solution provider, Wah Hong has established many plants in Suzhou, Huizhou, Ningbo and Xiamen to achieve benefit of local supply and economical scale. Today Wah Hong already becomes a global largest cutting manufacturer in optical films and sheets of backlight unit.
