Major Products

Polyester Bulky Stretch Yarn (B.S.Y.) fabric series: Provides fabrics with 4-way mechanical stretch (spandex free), good UPF, and high breathability. In addition, the production process for BSY collection is more environmentally friendly than spandex-laden fabrics in terms of chemical, energy use and waste management.

Hybrid merino wool blends (Janerino[®]) fabric series: Possesses merino wool's inherent anti-odor, quick-dry properties while exploiting the durability and moisture management performance of polyester.

Knit Fabrics: Circular knits and warp knit tricot consisting of durable polyester mesh, liners and polyester/spandex base layer stretch fabrics and 37.5/Cocona fabrics.

Value-added Services:

- Water-based PU coating application for pilling and abrasion performance enhancement.
- Anti-microbial treatment to keep fabrics fresh (Polygiene, Silvadur, Sanitized by Clariant, Microban, etc).
- Durable water repellent (DWR) coating for weather protection, PFC-free available.

Company Profile

Evertex Fabrinology Limited is a vertically integrated fabric manufacturer, that focuses on product development and innovation for outdoor enthusiasts. Our passion for the outdoors has lead us to develop a highly disciplined practice resulting in the utmost respect for the profession and the environment.

Here at Evertex, our relentless efforts to innovate high-performing, sustainably-made fabrics have rewarded us with a myriad of credentials and recognition. This has also presented us with the opportunity to work with distinguished clients in the field, such as Arc'teryx in Canada, Peak Performance & Norrøna in Scandinavia.

TOMLONG
Techstile Corporation

Major Products

- TPU Laminated Fabrics
- Weldable/Sealable Fabrics
- Waterproof Fabrics
- Airtight Fabrics

Company Profile

Thermoplastic Polyurethane Industry has been developed in Taiwan for several decades, however due to lack of qualified high bonding laminators, there was a big gap between the film makers and downstream manufacturers. Thus, a group of experienced people that came from textile, chemical and electronic industries gathered together to set up TOMLONG TECHSTILE CORP. to meet the growing demands from many application.

Being distinct from other laminators in garments fabrics, TOMLONG deeply involve in product design and finished product making. After working as the bridge between two fields for many years, our rich knowledge, quality technique and excellent service help us have earned good reputation among many famous brands in outdoor, sport, marine, automobile, medical, military industries and more. Now TOMLONG is not only specialized in high bonding TPU film lamination, but also is a total solution provider in composite material.

We have flexible manufacturing machines and QC inspection equipment to fulfill customers' need. We are able to laminate/coat diversified textiles such like Nylon, Polyester, N/T, Cotton, N/C, Recycled Yarns; Woven, Knitted or Nonwoven. Most of our laminated/coated fabrics are for waterproof or inflatable devices. About a half of our working partners are graduated from the universities and are always taking challenge, that make us being recognized as a technical oriented company.
