- PET Fiber/Fabric/Garment

Company Profile

Far Eastern New Century having innovative thinking, superior technology, and excellent managerial skills, we aim to lead the polyester industry and maximize the value of our holdings in real estates and equity investments that shall bring happiness and prosperity to the community where we serve.

Green products account for a quarter of our production business revenue. FENC is the world's top R-PET supplier and our eco-friendly and toxin-free products play a leading role in the global market. We have been incorporating environmental conservation into every aspect of our businesses, including investments, technology and management, with the aim of promoting green industry. We have not only created "TopGreen Ocean" filament by using recycled ocean waste PET bottles but succeeded in turning high-quality yarns into green products for Adidas and Parley (a Non-Governmental Organization for marine environmental protection). The sales of such "TopGreen Ocean" made products have grown exponentially and are expected to double in 2018. In addition, we have expanded a granulation production line for recycled nylon 6,6, which has received the Global Recycled Standard certifications. Regarding our R-PET products, in order to meet the requirement for food-grade packaging materials and being recognized by well-known beverage brands, we have also developed tracer technology to identify the source of our recycled feedstock and kept reducing water consumption.

Major Products

- Fine Gauge with Micro Fiber Fabric, Double Knit Fabric, Spacer Fabric, Interlock Fabric, 2 Ways Tricot Fabric, Power Net

Company Profile

Tex Tile Enterprise Company Limited was established in 1988 primarily as a manufacturer of warp and weft knitted fabrics. Recognizing customer demand for quality and accuracy, coupled with a preference for collaborating with vertically integrated companies, we made a substantial investment into building and launching our own state-of-the-art dye house, Cotex Company Limited, in 2003.

We create innovative and beautiful performance fabrics focused on the intimate apparel and active sportswear lines. Our technical expertise in design, manufacturing, and dyeing, combined with the most advanced knitting and dyeing machinery from Germany, provide us with the confidence that we can serve the marketplace and meet the needs of our customers.

Our company deals with ultra-delicate high gauge fabrics in every step of the manufacturing process, from knitting to packing.

We create more comfortable and smoother hand feel in spacer fabrics, while maintaining the cushion, as well as minimize thickness variance among right, middle, and left of the same fabrics.

Tex Tile also avoids grin lines, which mostly appear in dark-colored fabrics. Our unique spandex dyeing technology makes color richer and fabric appear more even.

We guarantee color fastness to grade 4 of AATCC 61 2A/ISO105 C06 B2S by employing 75D/144F.

Major Products

Polyester filament, spun polyester yarn, spun polyester sewing thread, white, dyed and finished; Polyester or Cationic dyeable polyester filament yarn for collar cloth, string, tape, embroidery thread, dyed and finished; Nylon yarn, nylon sewing thread, dyed and finished

Company Profile

Tohitomo is a professional polyester fibre dyeing factory. We offer filaments for all applications, such as garments, weave labels, embroidered lace, shoelaces, webbing, ribbons, footwear industry and textile industry. We have developed nearly 100 types of polyester long and short materials for a wide range of choices. We can meet customers' needs for design and the development of new fibers. Offering fast delivery, high quality, and reasonable price services.

The monthly output of Tohitomo can approximately reach 300 tons. In addition to the supply of knitting, plain weaving plants, trademarks, webbing and ribbon factories, and shoe factory color yarns, flame-resistant sewing threads can also be supplied. The quality comply with the flame retardant requirements of CFR1615/1616 which was formulated by the American Consumer Safety Association. Tohitomo also apply Oeko-Tex 100 Class 1 (for children's wear) certificates every year. Apply Global Recycled Standard (GRS) mark that requires reducing/eliminating the damage caused by producing and ensuring that the relevant textile supply chain meets the content requirements.

Continuously, cooperated with Kun Shan university, National Kaoshiung University of Science and Technology, and Taiwan Textile Research Institute in technology development. At present, we have also developed the upper cloth weaving and upper cloth color yarn supply orders. Welcome to contact with the sales department.

Tohitomo spend huge sums to develop a "24-hour online ordering system" to break through the previous "person-to-person inquiry" model and establish a production process/consolidation service system to provide 24-hour real-time production progress inquiry function. Customers can get their product information more flexible.

Major Products

- Shoelace Acetate Tipping Film
- Cord Metal Aglet
- Reflective Yarn and Reflective Tape

Company Profile

Tyan Kuei is a Taiwan based "SHOELACE ACETATE TIPPING FILM" manufacturer. We specialize in innovative and high quality accessories for Garment or Footwear use. Serve customers for more than 30 years and in more than 40 countries.

Besides traditional shoelace film, a more environmental friendly film has been developed. It's named as "DEP FREE FILM" (TK-EF01 or PHTHALATE FREE FILM)". It's certified by OEKOTEX, SGS and BV test, etc. DEP FREE FILM is a new trend and required by several brands already.

In addition, we supply diversified types of "PRINTED ACETATE FILM", "STRING METAL AGLET" and "REFLECTIVE MATERIAL". They are in close conjunction with client and market needs.

1. Printed Film: customized logo designs are producible
2. Metal Aglet & Plastic ABS Head: for shoelace, cord, narrow fabric and garment string
3. Reflective Material: widely used on footwear, garment, sportswear or safety wear (reflective yarn, reflective tape, reflective heat transfer, reflective piping).

Through our keen observation to the market, we are committed to delivering value to customer and environment to create a win-win situation.
